

Target 5 with Quotients

Directions:

1. Players take turns rolling 2 dice and choosing which expression they want to use their dice in.
2. The player writes the numbers in the blank boxes for one of the expressions, solves it, and then records their quotient.
3. After 5 rounds the player whose sum of quotients is closest to 5 wins.

Player 1			Player 2		
Round 1	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	
Round 2	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	
Round 3	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	
Round 4	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	
Round 5	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient	$\frac{1}{\square} \div \square$ or $\square \div \frac{\square}{1}$	Quotient
